

Build a futuristic 3D landing page for Aiv... Agent 3

Installed three, @types/three, embla-carousel-autoplay

Now let me update the HTML head and create the color

configuration:

Edited client/index.html

Edited tailwind.config.ts

Now let me create all the components and their examples in

parallel:

Show 21 more

Edited client/src/components/examples/Footer.tsx

Now let me restart the workflow to see the application in action:

Restarted Start application

Took a screenshot

I need to fix the WebGL error. Let me add proper error handling for

the Three.js background:

Show 3 more

Took a screenshot

What do you think of the design? Would you like me to adjust any

colors, spacing, or add any features?
